What is Jewellery ERP?

We have developed and deployed ERP for jewellery manufacturer. The modules cover designs, inventory management and Sales & Distribution management. In order to meet aggressive product development objectives and demand, the key lies in meeting today's challenges and anticipating tomorrow's. Our approach starts with analysing and defining product architecture, i.e. creating a prototype, followed with product development strategy with our proven implementation approach.

Training our professionals and then testing the software, before it is implemented in your organisation follows it, resulting in high cost & time reduction and proficiency.

ERP SOFTWARE IMPROVES PRODUCTIVITY AND PROFITABILITY OF JEWELRY BUSINESSES BY PROVIDING

- Accurate tracking of all business transactions. Comparing periodical data provides information necessary to control costs, improve customer services and generate higher profit
- Inventory module that is specifically designed to provide all most control on diamonds and color stones inventory
- Production module that helps in having a precise production plan
- Provision to help sell goods on Memo – a transaction very much specific to jewelry industry
- Powerful security features that permit view and access only by authorized personnel
- Diaspark ERP is a ready-to-use as well as customizable to meet jewelry industry's unique needs.
- Our experts can set up a complete customized solution along with data transfer from an old system and also provides comprehensive training.
