STARS Software is a dynamic & customizable MIS tool; a one-roof solution to bridge the gap between BI and reporting tool's requirements of the clients; and to provide them with the best application available in the market which serves their reporting & Business Intelligence requirements together.

STARS Software is especially developed for managing and tracking every transaction in the regulated environments. Our high-performance, relational database program tracks and maintains accurate, real-time information. It is user-friendly. It manages your Daily Schedules, Job Summary, Inventory, Accounts and all other daily transactions. Records include Sales, graphs and many more features.

STARS Software involves all aspects of gathering, storing, tracking, retrieving and using the information within a business organization. All the policies, procedures, and practices that direct an organization's operations and the staff that interacts with the information, combined with the software and hardware, comprise an information system.

STARS Software is fully customizable application that can be developed as per the client's requirements. Typically, it is a user based application, thus, there is no limitation on the number of users.
